

## PCP in mHealth and What We Learnt

In DECIPHER PCP, a new competitive process was used for developing mHealth cross border services for Diabetes Type 2.

Experiences and relevance of PCP (pre-commercial procurement) process are presented in this event. A discussion on innovation in mHealth and the key drivers will be held. Additionally, the three selected DECIPHER PCP finalists will present their R&D results.

### Contents

- 8:30 Registration
- 9:00 **Opening by Catalanian Department of Health**

- 10:15 Coffee Break
- 10:30 Finalists’ R&D results
- 11:30 Procurers’ experiences
- 12:00 Q & A
- 12:15 Lunch

## Why you should be there?

### \* **Public Service Providers and Decision Makers**

Pre-commercial procurement is believed to be a means for getting services and products that correspond to procurer needs and are tailored to particular end users. DECIPHER PCP procurers from Spain, Italy and the UK will present their experiences and valuable lessons learnt, so that in the future service providers will know what to look for, when considering services that cannot be found in the market.

### \* **Companies & Technology Experts**

PCP is believed to give the chance to SMEs to approach and better understand the world of public procurement, and put them in a better position for making offers and participate to public tenders in the future. The DECIPHER PCP three finalists will present their mHealth solutions and talk about their experiences.

### \* **Policy Makers & Other Interested Parties**

A round table discussion and a Q & A session aim at shedding light to the role of Innovation in public procurement, especially that of health related services.

## DECIPHER PCP partnering event: Digital Health & Wellness Summit 2017 @ 4YFN
